## HERAUSRAGEND FÜR MEHR PRODUKTIVITÄT IN IHRER FERTIGUNG.

Sie haben herausfordernde Zerspanungsaufgaben? Wir haben herausragende Lösungen! Bereits seit drei Generationen entwickeln wir Werkzeugsysteme, die durch Qualität, Langlebigkeit und Prozesssicherheit überzeugen. Als ARNO Kunde profitieren Sie von der Mischung aus Erfahrung und Pioniergeist, die unser Familienunternehmen seit jeher auszeichnet. Wir sind typisch schwäbische Tüftler und stolz darauf, unseren Kunden mit cleveren Neu- und Weiterentwicklungen auch in Zukunft entscheidende Wettbewerbsvorteile zu sichern.

## *OUTSTANDING FOR MORE PRODUCTIVITY IN YOUR PRODUCTION.*

*Do you have challenging machining tasks? We have outstanding solutions. For three generations, we have been developing tool systems which have outstanding quality, long tool life and process reliability. As an ARNO customer you benefit from a combination of experience and pioneering spirit. Besides these values we are also influenced by the typical Swabian talent for inventiveness. We are proud to assist our customers to secure that extra competitive advantage with clever new developments and advancements and we will continue along this path in the future.*

## ECCEZIONALE PER UNA MIGLIORE PRODUTTIVITÀ NELLA TUA PRODUZIONE.

Avete obiettivi di lavorazione macchina ambiziosi? Noi abbiamo soluzioni eccezionali adatte ai tuoi scopi. Per tre generazioni abbiamo sviluppato sistemi utensili di qualità eccezionale, lunga durata dell'utensile e affidabilità del processo. Come clienti ARNO avete la possibilità di beneficiare di una combinazione di esperienza e di spirito pionieristico. Oltre a questi valori siamo anche influenzati dal tipico talento Svevo per l'inventiva. Siamo orgogliosi di supportare i nostri clienti assicurando questo vantaggio competitivo con sempre nuove ed innovative soluzioni e lo faremo sempre anche in futuro.

# Vielseitig bei präzisen Einstichen: das neue ATS-System von ARNO. *Versatile for precise parting off: the new ATS System from ARNO.* Versatile nella realizzazione di scanalature precise: il nuovo sistema ATS di ARNO.

**Wirtschaftlich dank dreischneidiger Schneidplatten, schnell beim Werkzeugwechsel und stabil durch die Torx-Plus Schraubenklemmung mit optimalem Form- und Kraftschluss: Das ATS Werkzeugsystem zum Außenstechen hat viele Stärken. Vielseitigkeit gehört ebenfalls dazu: Durch die versenkte Klemmschraube und die kompakte Bauform können Sie das ATS-System auch beim Schulterstechen oder im Langdrehbereich einsetzen. Für eine reibungslose Spanabfuhr und hohe Standzeiten sorgt die optimierte Kühlmittelzufuhr der Halter auf die Span- und Freifläche.**

*Efficient thanks to 3-edged inserts; fast tool changes and rigid due to the Torx-Plus screw clamping system to offer optimised clamping and insert location: The ATS tool system for external parting off has many strengths. One of them is versatility: the countersunk clamping screw and the compact design make the ATS system ideal for applications like shoulder grooving or Swiss type machining. The optimised coolant supply to the cutting edge and tool flank ensure smooth chip evacuation and long tool life.*

Economico grazie agli inserti a tre taglienti, veloce al cambio utensile e stabile grazie al bloccaggio a vite Torx-Plus con bloccaggio con accoppiamento dinamico e geometrico ottimale: Il sistema per utensili ATS per l'incisione esterna ha molti punti di forza. Uno di questi è la versatilità: Grazie alla vite di serraggio a testa svasata e alla struttura compatta, è possibile utilizzare il sistema ATS anche per scanalatura di spallamenti o nella tornitura cilindrica. L'adduzione del refrigerante ottimizzata, integrata nel supporto sulla superficie di spoglia superiore e sul fianco garantisce una evacuazione dei trucioli regolare e una lunga durata.

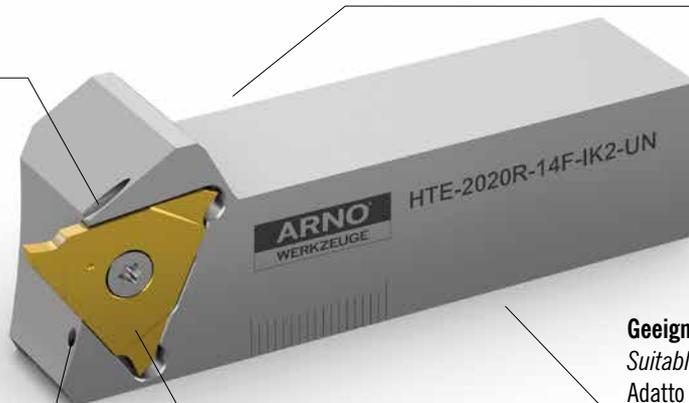

**Standard: direkte Kühlung der Spanfläche**  
*Standard: direct cooling of the cutting edge*  
Standard: raffreddamento diretto della superficie di spoglia superiore

**Optimale Positioniergenauigkeit durch komplett geschliffene Ausführung**  
*Optimal positioning accuracy due to the completely periphery grinding*  
Precisione di posizionamento ottimale grazie al design completamente rettificato

**Standard: optimale Kühlung der Freifläche**  
*Standard: optimised cooling of the tool flank*  
Standard: raffreddamento ottimale del fianco

**Geeignet zum Stechen an der Schulter**  
*Suitable for grooving at the shoulder*  
Adatto per la scanalatura degli spallamenti

**Stechsystem mit 3-schneidiger T-Wendeschneidplatte**  
*Grooving system with T-shaped indexable insert with 3 cutting edges*  
Sistema di scanalatura con inserto a 3 taglienti

**Toleranz Einstechbreite EB ±0,02 mm**  
*Tolerance groove width EB ±0,02 mm*  
 Larghezza gola tolleranza EB ±0,02 mm

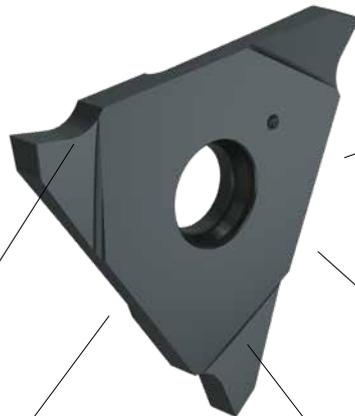

**Geometrie -GA mit 8° Spanwinkel**  
*Geometry -GA with 8° rake angle*  
 Geometria -GA, angolo di spoglia superiore di 8°

**Geschliffene Auflagefläche**  
*Ground contact surface*  
 Superficie di appoggio rettificata

**Universelle Hochleistungs-Sorte AP5020**  
*Universal high-performance grade AP5020*  
 Varietà universale ad alte prestazioni AP5020

**Geschliffene Anlageflächen**  
*Ground contact surfaces*  
 Superfici di appoggio

**Einstehtiefe ET max. 6,5 mm**  
*Cutting depths up to ET = 6.5 mm*  
 Profondità di scanalatura fino a ET = 6,5 mm

**Verfügbar in den Formen B1 bis B4 und C1 bis C4**  
*Available in a variety of shapes from B1 to B4 and from C1 to C4*  
 Disponibile in diverse forme da B1 a B4 e da C1 a C4

**Zusätzliche Kühlung über Kühlmitteldüse**  
*Coolant jet for additional cooling*  
 Refrigerante addizionale attraverso il ugello

**VDI-Schaft**  
*VDI-Shank*  
 Attacco VDI

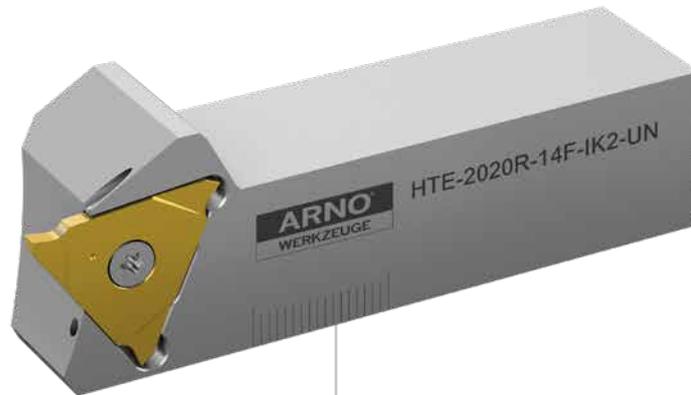

**Eine Schnittstelle weniger für mehr Prozesssicherheit: Trägerwerkzeug und KMH-Werkzeugaufnahme passen perfekt zusammen**  
*One interface less for more process reliability: Tool holder and KMH holder fit together perfectly*  
 Un elemento in meno per garantire maggiore sicurezza di processo: L'utensile e il adattori KMH si adattano perfettamente

**Längeneinstellung über definierten Bereich**  
*The tool holder can be adjusted within the defined scales*  
 Regolazione della lunghezza attraverso marcatura sul portautensile

**Zielgerichtete Kühlmittelübergabe für sichere Prozesse**  
*Efficient coolant supply for reliable processes*  
 Passaggio mirato del liquido refrigerante, processi sicuri

## ARNO® SpecialDesign

Diese Monoblockhalter bekommen Sie mit Ihren spezifischen Kühlschlüssen. Ein Anfrageblatt hierzu finden Sie auf Seite 21 oder im Internet unter: [www.arno.de/service/downloads](http://www.arno.de/service/downloads)  
Bitte beachten Sie den Hinweis zur Verwendung des Halters auf KMH-Werkzeugaufnahme (VDI) auf den Seiten 16–19!

The coolant inlet can be supplied to your specification, please complete enquiry sheet on page 21 or download this from: [www.arno.de/service/downloads](http://www.arno.de/service/downloads).

Please refer to notes for using KMH tool holder (VDI) on page 16–19!

Per altre richieste compilare modulo a pag. 21 o scaricarlo da: [www.arno.de/service/downloads](http://www.arno.de/service/downloads). Vedere i suggerimenti di utilizzo degli adattatori KMH (VDI) a pagina 16–19!

## ARNO® SpecialDesign

Diese Monoblockhalter bekommen Sie mit Ihren spezifischen Kühlschlüssen. Ein Anfrageblatt hierzu finden Sie auf Seite 21 oder im Internet unter: [www.arno.de/service/downloads](http://www.arno.de/service/downloads)  
Bitte beachten Sie den Hinweis zur Verwendung des Halters auf KMH-Werkzeugaufnahme (VDI) auf den Seiten 16–19!

The coolant inlet can be supplied to your specification, please complete enquiry sheet on page 21 or download this from: [www.arno.de/service/downloads](http://www.arno.de/service/downloads).

Please refer to notes for using KMH tool holder (VDI) on page 16–19!

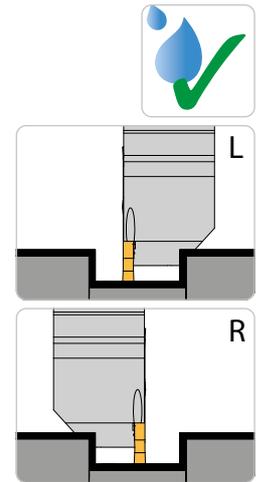

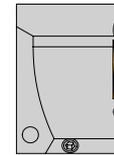

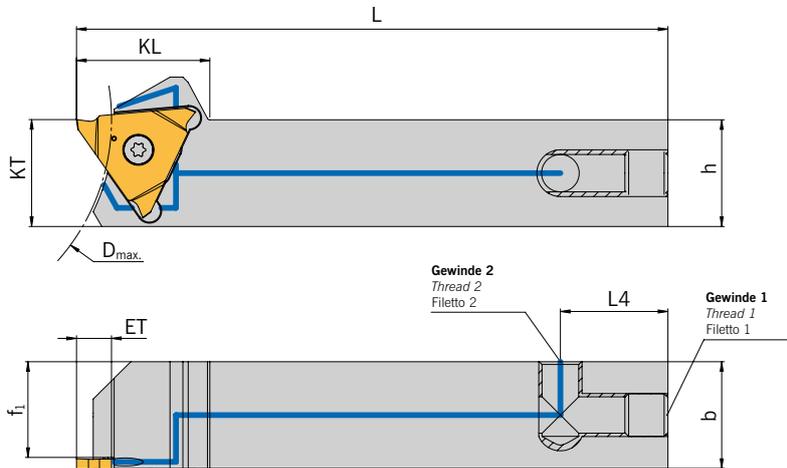

Per altre richieste compilare modulo a pag. 21 o scaricarlo da: [www.arno.de/service/downloads](http://www.arno.de/service/downloads). Vedere i suggerimenti di utilizzo degli adattatori KMH (VDI) a pagina 16–19!

## ARNO® SpecialDesign

Diese Monoblockhalter bekommen Sie mit Ihren spezifischen Kühlschlüssen. Ein Anfrageblatt hierzu finden Sie auf Seite 21 oder im Internet unter: [www.arno.de/service/downloads](http://www.arno.de/service/downloads)  
Bitte beachten Sie den Hinweis zur Verwendung des Halters auf KMH-Werkzeugaufnahme (VDI) auf den Seiten 16–19!

The coolant inlet can be supplied to your specification, please complete enquiry sheet on page 21 or download this from: [www.arno.de/service/downloads](http://www.arno.de/service/downloads).

Please refer to notes for using KMH tool holder (VDI) on page 16–19!

Per altre richieste compilare modulo a pag. 21 o scaricarlo da: [www.arno.de/service/downloads](http://www.arno.de/service/downloads). Vedere i suggerimenti di utilizzo degli adattatori KMH (VDI) a pagina 16–19!

### ARNO® SpecialDesign

Diese Monoblockhalter bekommen Sie mit Ihren spezifischen Kühlan schlüssen. Ein Anfrageblatt hierzu finden Sie auf Seite 21 oder im Internet unter: [www.arno.de/service/downloads](http://www.arno.de/service/downloads)  
Bitte beachten Sie den Hinweis zur Verwendung des Halters auf KMH-Werkzeugaufnahme (VDI) auf den Seiten 16–19!

The coolant inlet can be supplied to your specification, please complete enquiry sheet on page 21 or download this from: [www.arno.de/service/downloads](http://www.arno.de/service/downloads).

Please refer to notes for using KMH tool holder (VDI) on page 16–19!

Per altre richieste compilare modulo a pag. 21 o scaricarlo da: [www.arno.de/service/downloads](http://www.arno.de/service/downloads). Vedere i suggerimenti di utilizzo degli adattatori KMH (VDI) a pagina 16–19!

## Lang drehen, schnell Wechseln. *Swiss type machining, fast changes.* Tornitura cilindrica, cambio utensile rapido.

**AFC-Trägerwerkzeug: die Revolution für den schnellen Werkzeugwechsel – angemeldet zum Patent.**

**Ihre Lösung für einen komfortablen Werkzeugwechsel trotz engem Innenraum bei Langdrehmaschinen: Der zweiteilige AFC-Träger, mit dem selbst ungelernntes Personal Werkzeuge schnell und sicher austauschen kann.**

**So funktioniert´s: Der hintere Teil des Trägerwerkzeugs (AHA-Anschlag) wird einmal fixiert. Für den Austausch des Werkzeugs muss nur das Vorderteil abgenommen werden. Ein erneutes Anfahren und Einstellen des Nullpunkts entfällt durch die immer gleiche Länge zur Spitze des Schneideinsatzes damit komplett – egal, ob er das Drehsystem oder das Stechsystem benutzt. Verbunden werden beide Trägerteile einfach über ein Stecksystem mit O-Ring. Dadurch ist das Vorderteil beim Aufsetzen auf die Steckverbindung sofort gesichert – nichts fällt versehentlich in die Maschine. Gleichzeitig bleibt durch eine schwimmend gelagerte Halterung genug Spielraum für einen Ausgleich des Winkelversatzes, die beiden Teile schmiegen sich optimal aneinander. So profitieren Sie von einer hohen Wechselgenauigkeit und einer dichten Kühlmittelübergabe.**

*AFC tool holders: the revolution in fast tool changes – patent applied.*

*Your solution for easy tool changes despite space constraints in Swiss type machines: the two-part AFC holder – even untrained staff can replace tools fast and reliably.*

*This is how it works: The rear part of the tool holder (AHA fixed stop) is first fixed in place. Only the front part is removed to replace the tool. This eliminates the need to restart and recalibrate the zero point since the length to the insert tip is always the same – whether the grooving system or the turning system is used. The two holder parts are simply joined by a connector system with O-ring. The front part is then secured immediately it is placed in the connector – nothing drops into the machine accidentally. At the same time, the floating mount provides enough clearance to compensate for angle offset. The two parts then fit together perfectly. Now you benefit from a high level of precisions when changing tools and a leak-proof coolant hole.*

Portautensili AFC: la rivoluzione per il cambio utensile rapido – in attesa di brevetto.

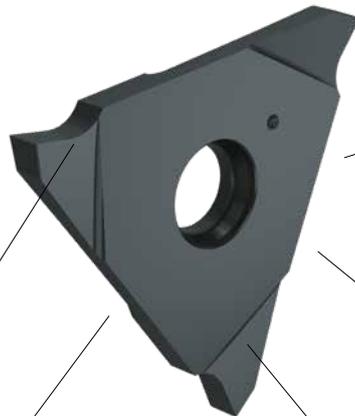

La vostra soluzione per un cambio utensili confortevole nonostante il ridotto spazio interno nei torni a fantina mobile: Il supporto AFC in due parti con il quale anche il personale non addestrato può sostituire gli utensili in modo rapido e sicuro.

Funziona così: la parte posteriore dell'utensile (arresto AHA) viene fissata. Per sostituire l'utensile, deve essere rimossa solo la parte anteriore. Non è necessario un nuovo avviamento e una nuova regolazione del punto zero dal momento che la punta dell'inserto ha sempre la medesima lunghezza, indipendentemente dal fatto che si utilizzi un sistema di tornitura o un sistema di scanalatura. Le due parti del supporto vengono collegate mediante un sistema ad innesto con o-ring. La parte anteriore viene subito assicurata quando viene posizionata sull'innesto a spina – nulla può cadere inavvertitamente all'interno della macchina. Allo stesso tempo, un supporto flottante lascia gioco sufficiente per compensare il disallineamento angolare, le due parti si incastrano in modo ottimale l'una nell'altra. Approfittate anche voi di un'elevata precisione di cambio e di un canale ermetico del refrigerante.

**Toleranz Einstechbreite EB ±0,02 mm**

## Geometriebeschreibung / Geometry description / Descrizione delle Geometria

### -GA

- **Hervorragend geeignet für die Bearbeitung von Stahl und nichtrostendem Stahl**
- **Komplett geschliffene Geometrie**
- **Hohe Präzision und Wiederholgenauigkeit**
- *Excellent for machining steel and stainless steel*
- *Completely ground geometry*
- *High precision and repeatability*
- *Adatto in maniera eccellente alla lavorazione di acciaio e acciaio inossidabile*
- *Geometria completamente rettificata*
- *Elevata precisione e accuratezza di ripetibilità*

## Sortenbeschreibung / Grade discription / Descrizione delle Geometria

### AP5020

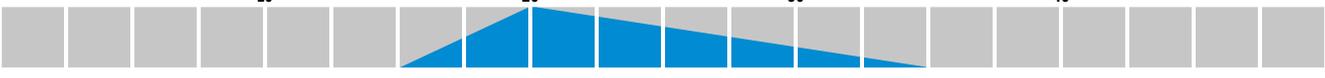

- **Universell einsetzbare Sorte**
- **Gutes Zusammenspiel von Verschleißfestigkeit und Zähigkeit**
- **Hohe Beständigkeit gegen Oxidation**
- *Universally applicable type*
- *Good interplay between wear resistance and toughness*
- *High resistance to oxidation*
- *Varietà utilizzabile universalmente*
- *Buona interazione tra resistenza all'usura e tenacità*
- *Elevata resistenza all'ossidazione*

ARNO-2021-06-ATS-DEI

# HERAUSRAGEND VIELSEITIG UND INNOVATIV.

Kurz- oder Langdrehen, Stechen, Drehen, Bohren oder Fräsen: Was auch immer Sie vorhaben – es lohnt sich, bei ARNO vorbeizuschauen. Wir haben für fast jeden Anwendungsfall in der Zerspanung eine Lösung. Mit der richtigen Mischung aus Erfahrung, Pioniergeist und Qualität sorgen wir dafür, dass Sie mit passgenauen Werkzeugsystemen, Toolmanagement-Lösungen und cleveren Innovationen das Beste aus Ihrer Fertigung rausholen.

Mehr Infos zu unseren innovativen Systemen finden Sie unter [www.arno.de](http://www.arno.de)

## *OUTSTANDING VERSATILE AND INNOVATIVE.*

*Turning or Swiss type turning, grooving, drilling or milling: whatever your requirements are, it's worth your while to take a look at ARNO. We have a solution for almost every metal-working application. We have the right mix of experience, pioneering spirit and quality to ensure that you get the best out of your production with the right tool systems, tool management solutions and clever innovations.*

*For more details on our innovative systems, go to [www.arno-tools.co.uk](http://www.arno-tools.co.uk) / [www.arnousa.com](http://www.arnousa.com)*

## ECCEZIONALE VERSATILE ED INNOVATIVO.

Tornitura o fantina mobile, scanalatura, foratura o fresatura: qualunque siano le tue esigenze, vale sempre la pena considerare ARNO. Abbiamo tantissime soluzioni per la lavorazione dei tuoi materiali. Abbiamo il giusto mix di esperienza, spirito pionieristico e qualità per assicurarti di ottenere il meglio dalla tua produzione con gli utensili corretti, soluzioni di gestione degli utensili e innovazioni tecniche intelligenti.
